

Containment Solutions

PetroSeal Certification of Fuels Compatibility

PetroSeal is an Icon product label for a proprietary polysulfide blend sealant used in liquid petroleum storage containment applications.

Polysulfide material testing with fuels and its long history of performance with fuel storage has proven that it is highly compatible in long-term exposure in direct contact with fuels, including all ethanol blends typical in the industry.

It is specifically approved for application as a fitting sealant and as a coating for corrosion prevention on equipment inside sumps and tanks.

Please contact Icon for specific application instruction and MSDS.

The following are the approved Icon part numbers, for the PetroSeal:

IAC PS200 - Icon PetroSeal Sealant, 200ml Cartridge Gray

IAC PS400 - Icon PetroSeal Sealant, 400ml Cartridge Gray

IAC PSQUART - Icon PetroSeal Sealant, 1 quart container Gray

IAC PSGALLON - Icon PetroSeal Sealant, 1 gallon container Gray

Sincerely,

A handwritten signature in black ink, appearing to read 'Logan McDowell'.
