**RE: Icon iBond Compatibility Statement**

This letter is to certify the compatibility of Icon Containment Solutions manufactured **iBond** structural bonder to all ASTM **Methanol** blended fuels, **Ethanol** blended fuels from E10 to E100, **Biodiesel** blends from B2 to B100, and **DEF** diesel exhaust fluid typical in fuel storage containment sump applications for restoring UST/AST containment sumps to a compliant, fuel-tight condition.

Icon **iBond** is a fast-setting structural bonder used to permanently repair leak issues from minor cracks, seams, and other damage to FRP tank, transition, and dispenser sumps. It is often used in connection with substrate material to add structural integrity to the repaired area of the sump. A bonded repair is a significant advantage to the site owner, preventing unnecessary or premature replacement of the sump equipment.

If you have a need for any additional information, or have any questions regarding this statement or the specific product, please contact us at (855) Dry-Sump (379-7867).

Sincerely,

Jason Mitchell  
General Manager
